To whom it may concern-

The tightly packed Fairhaven needs a new idea for parking situation before we simply ban parking in this area. This plan that is now purposed is going to frustrate people to even be in Fairhaven, lots of people love to come here and most all of them are driving in vehicles of some sort. Being that it rains alot this plan is looking like a wishful but needing to be more stretched out and needs further implementations. I doubt my clients, who at times have limited ability to walk comfortably, will enjoy the length of walking they might have to trek to my office without a closeby parking location. I'm sure not to be the only person with this same complaint for client access comfortably. Please give us workers in Fairhaven fair warning of a more suiteable plan in the future, that will hopefully appease people rather than shake their nerves, as it has mine.

Regards,
L
