Subject: Just Say NO! (Traffic/Parking revision in Fairhaven)

---

I am a property owner in the heart of the Historic Fairhaven district. I have NOT received a single notice of any proposed traffic changes. I only found out about this yesterday! If the proposal to modify the historical traffic patterns moves forward, I will be legally challenging this action. These traffic/parking modifications will have negative financial and environmental impacts that have not been adequately studied. I believe these changes also impact the historical character of Fairhaven and must not be made. Additionally, the loss of parking, without studying and approving replacement stalls has been inadequate. Views and access are also issues that will be negatively impacted as well.

We do not have the climate to make people walk to do their shopping (this is not southern california).

Thank you for considering my statements.

Rosemary Bolster
